Suggested Wine Yeasts - 2026

Whites

<u>Brand</u>	<u>Name</u>	<u>Type</u>	<u>Alcohol Tolerance</u>	<u>Purpose</u>
Lalvin	RC-212 Red Wine	Dry	14.0%	Ideal for full bodied red wines. Emphasizes fruit and spice notes, accentuates character in red grapes.
Red Star	Cote Des Blanc	Dry	14.0%	One of the most traditional aromatic strains for white wines. An excellent choice for fruity wines.
Vintners Harvest	MA33 Saccharomyces Cerevisiae	Dry	14.0%	Acid reducing strain excellent for fruity white & blush country wines especially where residual sugars are desired. Metabolizes 30% - 35% of malic acid to lower TA.
Wyeast	4242 Fruity White	Liquid	12-13%	Produces extremely fruity profile, high ester formation, bready aromas with vanilla notes.
Wyeast	4783 Sweet White	Liquid	14.0%	Produces distinct Riesling character. Rich flavor, creamy, fruity profile with nice dry finish and a hint of Riesling sweetness in the aftertaste.

Reds

Vintners Harvest	R56 Saccharomyces Cerevisiae	Dry	13.5%	Ideally suited for rich, full bodied red wines with exceptional flavor complexity.
Wyeast	4028 Red	Liquid	14.0%	Ideal for red or white wines that mature rapidly with Beaujolais type fruitiness, and for bigger reds requiring aging. Low foaming, low sulfur production.
Wyeast	4244 Italian Red	Liquid	14.0%	Rich, very big and bold, well-rounded profile. Nice soft fruit character with dry crisp finish.
